- 14. ADJOURNMENT

RETAIN WHITE COPY FOR CHAPTER FILE

//
The February 21st meeting of the Chapter was held at the Cathay House, with President Kirby in the chair.

The minutes of the January Meeting were adopted as read on a motion by Stan Bullis, seconded by Don Ferguson.

President Kirby made reference to the Open House being held at Carleton University, and mentioned that it would be of interest to all engineers.

The speaker of the evening, Mr. Charles Rink of Industrial Acoustics Company of New York was introduced by Vice-President Paul Fortier.

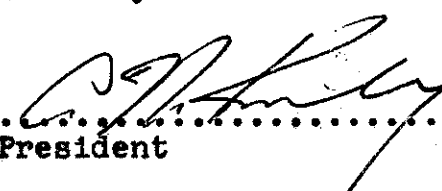

Mr. Rink made full use of his not inconsiderable talents as a speaker, and assisted by a group of appropriate slides, gave a most concise account of the work done and the methods used in the investigation and the calculation of noise in fan and duct systems. His continual reference to the charts and information contained in the Guide Chapter on Sound Control was most useful to those members present.

The discussion also covered the calculation of the noise reduction required in an air conditioning system to conform to a specified noise criteria; this was done in a very clear manner, and was much appreciated.

The speaker was thanked on behalf of the Chapter by Don Smiley, and was immediately nailed for further discussion by interested members.

On this note the meeting was adjourned on a motion by Paul Fortier, seconded by John Dugay.
